Compiled by Helen Hough, M LS, James G. Collins & Associates.

The *Tests and Measures in the Social Sciences* (TMSS) is an index to tests and measurement tools used in psychology, sociology, health, education, marketing, management, and so on, that may be found in one or more reference resources.

TMSS was designed as a service to locate tests, measures, instruments, etc. when there is a known title and a copy of the item is desired.

This section, a part of the TMSS index, features one resource for the many tests that can be found quickly in compilation volumes available in and through our libraries and online services.

When full text of the test is available in a print or online volume, this is indicated in the TMSS entry.

Each entry contains (when possible): Test title, test acronym, copyright or publication date(s), author(s), and source citation.

Copyright permission is NOT provided for use or reproduction of the instruments, neither here nor usually in the print resource. Contact the copyright holder of the measure for these permissions.

As a content listing of a published work, validity and accuracy of this page does not change over time. The TM SS pages are usually developed from information provided in a variety of locations within the original resource. If any of these pages are copied for modification on another site, please provide proper attribution. This version, originally created in 2023, is covered by all applicable copyright laws.
